

Graduate Actuarial Role

- **Melbourne based**
- **Broad range of involvement across the business**

St Andrew's Australia is a niche life and general insurer. We offer innovative and flexible insurance products and services to a diverse range of corporate and consumer clients. These products include consumer credit insurance and direct life insurance.

We are seeking an enthusiastic actuarial student to join our Melbourne-based actuarial team as a graduate for 2012.

As a member of a small team, you will be directly involved in everything that the team does. This role offers great variety and the opportunity to be exposed to a wide range of actuarial roles. You will work regularly with the Chief Actuary and functions across the business such as the Sales, Product and Finance teams. Your regular activities will include:

- Assisting in the valuation of life and general insurance liabilities and the determination of prudential capital requirements
- Assessing pricing and product design ideas, including product change initiatives and corporate tenders
- Conducting experience investigations

As a graduate of the University of Melbourne's actuarial program, you will have strong analytical and numerical skills. In addition, the ideal candidate will possess strong communication and interpersonal skills, attention to detail and have an enquiring mind.

The variety offered by this role means that you will gain a wide range of experience quite quickly, making this an ideal place to start your career. You will also receive a competitive remuneration package, with a range of benefits including generous study support.

For further information contact Andy Hamblin on (07) 3212 3355 or follow the link to review the position description and/or apply www.onetest.com.au/boqjobs/. Applications close on Tuesday, 18th October 2011. All applications will be treated with the utmost confidentiality.
